PROFESSIONAL SUMMARY

Bilingual IT professional with 2+ years of enterprise support experience at CINTAS (via Peller Technologies), progressing from Tier 2 Service Desk to IT Command Center Analyst. Specialized in critical incident management (P1/P2), root cause analysis, escalation management and customer-facing communication in English. Skilled at diagnosing software issues from logs, debugging API integrations, and translating complex technical problems into clear, customer-friendly language. Background in visual arts and photography — well positioned to support designers and creative professionals using design tools. Seeking a Technical Support or Implementation Engineer role at a creative SaaS company.

PROFESSIONAL EXPERIENCE

AI Builder & Automation Engineer — Laboratorios Silicio (independent)

Feb 2025 – Present · Nights and weekends through Apr 2026; full-time since.

- Built an AI coaching assistant on Telegram using Python and a RAG (Retrieval-Augmented Generation) architecture, routing across multiple LLM providers — OpenAI, Anthropic, Gemini and Ollama for local inference.
- Designed and shipped WhatsApp AI sales agents for clinics and spas on Node.js, Express and PostgreSQL, handling the full customer funnel from first contact to close.
- Built and deployed a serverless API on Cloudflare Workers with CORS restrictions, per-IP rate limiting and daily usage quotas, backing the AI assistant on my portfolio site.
- Deployed open-source LLMs (Llama, Mistral) locally via OpenWebUI on Ubuntu, configuring API authentication and model routing to optimize cost vs. performance.

IT Command Center Analyst (IOC) — Peller Technologies · Client: CINTAS

Feb 2025 – Apr 2026 · Promoted internally from Service Desk on technical performance.

- Led P1/P2 crisis bridges, coordinating cross-functional engineering teams (SAP) across countries in English under high-pressure, time-sensitive scenarios.
- Managed critical infrastructure maintenance: controlled power cycles and patching on VMware ESX hosts via vSphere during live production windows.
- Monitored system health via SolarWinds and AS400; analyzed application logs to distinguish software-level errors from infrastructure failures before business impact.
- Authored troubleshooting runbooks and internal documentation adopted by other agents across the team.

IT Service Desk Specialist, Tier 2 — Peller Technologies · Client: CINTAS

Oct 2023 – Feb 2025 · Promoted to Subject Matter Expert (SME).

- Managed high-volume ticket queues in ServiceNow, Odoo and Assyst against SLA targets, maintaining FCR above 80% and high CSAT scores.
- Resolved advanced identity management issues: MFA, SSO, Active Directory, Office 365 and Exchange for a distributed remote workforce.
- Coordinated directly with international engineering teams in English on escalated incidents.
- Built a Chrome extension that extracted key information from the ticketing tool and selected the correct template per scenario, making documentation faster for every agent on the account.

PROJECTS

- **Portfolio with AI assistant** — Interactive 3D site (Three.js, custom WebGL shader) with a retrieval-grounded AI assistant. Serverless backend on Cloudflare Workers: origin allow-listing, per-IP rate limits, daily caps and graceful degradation. Live at simbolo-dev.github.io.
- **Ticket Distribution & Demand Analysis** — Internal tool that distributed tickets across an L1 support team and analyzed demand by hour with a coverage map. Surfaced that the team was mis-scheduled across the day rather than understaffed.
- **Laboratorios Silicio** — AI consulting venture: WhatsApp AI agents for clinics and spas on Node.js, Express and PostgreSQL, with a two-brain architecture (static persona plus LLM).
- **Silicio Gadgets Ecosystem** — Commerce system with three modules synced in real time over APIs: a JSON-based inventory manager with POS functionality, an automated WhatsApp sales agent, and a live web catalog.

SKILLS

Support & Operations: Incident Management (P1/P2) · Crisis Bridges · Root Cause Analysis · Escalation Management · SLA-driven queues · Change Management · Technical Documentation · Runbook Authoring

Ticketing & ITSM: ServiceNow · Jira · Odoo · Assyst (equivalent workflows to Zendesk and Freshdesk)

Infrastructure & Identity: VMware vSphere · Active Directory · Azure AD Sync · Office 365 and Exchange · MFA and SSO · SolarWinds · AS400 (IBM i) · VPN Troubleshooting · Linux Server Monitoring

Technical: Python · JavaScript · Node.js · REST APIs · OAuth2 · Webhooks (Twilio, Baileys) · JSON · PostgreSQL · Git · Postman · PowerShell · Ubuntu/Linux Terminal · HTML · CSS

AI & Automation: RAG Systems · LLM API Integration (OpenAI, Anthropic, Gemini, Ollama) · Prompt Engineering · Serverless deployment (Cloudflare Workers) · AI-assisted scripting

Design & Creative: Photoshop · Illustrator · Figma · Photography · Meta Ads Manager

Soft Skills: Cross-functional collaboration · Stakeholder communication · Crisis communication · Customer-facing troubleshooting · Cross-cultural teamwork

EDUCATION & TRAINING

- **Full Stack Web Development Bootcamp** — Codeable (2023). JavaScript, HTML5, CSS3, database structures, technical logic.
- **Photography Course** — Technical and artistic photography; composition and light.
- **Currently learning:** UX Engineering principles · Python (advancing) · Generative AI pipelines (ComfyUI).

LANGUAGES

Spanish — Native. **English** — Professional working proficiency; led P1/P2 crisis bridges in English with engineering teams across multiple countries.
