

ALAN ALARCON OVIEDO

Technical Support Engineer | Implementation & Onboarding | Bilingual B2 | Remote-Ready

alanalarconoviedo@gmail.com | +52 222-345-8887 | Puebla, México | Open to Relocate

PROFESSIONAL SUMMARY

Bilingual IT professional with 2+ years of enterprise support experience at CINTAS (via Peller Technologies), progressing from Tier 2 Service Desk to IT Command Center Analyst. Expert in critical incident management (P1/P2), root cause analysis, and cross-functional communication in English. Background in visual arts, sales, and photography. Uniquely positioned to support designers and creative professionals using design tools. Skilled at diagnosing software issues from logs, debugging API integrations, and translating complex technical problems into clear, user-facing language. Hands-on builder of AI automations, real-time inventory systems, and WhatsApp sales agents, bringing a product-builder mindset to every support interaction. Seeking a Technical Support or Implementation Engineer role at creative SaaS company.

PROFESSIONAL EXPERIENCE

Independent AI Builder & Automation Engineer — Self-Directed / Laboratorios Silicio

Feb 2025 – Present

Building and deploying AI-powered tools and automations:

- ▶ Built a personal AI training coach on Telegram using Python and a RAG (Retrieval-Augmented Generation) architecture, connected to multiple LLM providers — OpenAI, Anthropic, Gemini, and Ollama for local inference.
- ▶ Deployed and managed open-source LLMs (Llama, Mistral) locally via OpenWebUI on Ubuntu, configuring API authentication and model routing to optimize cost vs. performance.
- ▶ Developed a real-time inventory sync system connecting a backend catalog to a live product web page — changes in inventory reflect automatically on the storefront.
- ▶ Comfortable with Ubuntu terminal, VS Code, and API integrations (REST, OAuth2); uses AI-assisted scripting to accelerate development.

IT Command Center Analyst (IOC) — Peller Technologies — Client: CINTAS *Feb 2025 – Present*

- ▶ Selected for internal promotion from Service Desk to Command Center based on technical performance and system knowledge.
- ▶ Managed critical infrastructure maintenance: executed controlled power cycles and patching on VMware ESX hosts via vSphere during live production windows.
- ▶ Led P1/P2 Crisis Bridges — coordinating cross-functional engineering teams (SAP) across countries in English under high-pressure, time-sensitive scenarios.
- ▶ Proactively monitored system health via SolarWinds and AS400; analyzed application logs to distinguish software-level errors from infrastructure failures before business impact.
- ▶ Authored troubleshooting runbooks and internal documentation adopted by other agents across the team.

IT Service Desk Specialist — Tier 2 — Peller Technologies — Client: CINTAS *Oct 2023 – Feb 2025*

- ▶ Promoted to Subject Matter Expert (SME) after demonstrating consistent excellence in complex issue resolution and system knowledge.
- ▶ Resolved advanced identity management issues: MFA, SSO, Active Directory, Office 365/Exchange for a distributed remote workforce.
- ▶ Managed high-volume ticket queues in ServiceNow, Odoo, and Assyst — maintaining FCR >80% and high CSAT scores.
- ▶ Coordinated directly with international engineering teams in English for escalated incidents.
- ▶ Built a Chrome extension to assist with scripting key information from the ticketing tool and selecting the proper template for each scenario, in order to make documentation easier for all the agents on the account

PROJECTS & CREATIVE WORK

- ▶ Telegram AI Fitness Coach - RAG system with multi-LLM routing (OpenAI / Anthropic / Gemini / Ollama), Python backend, Markdown-based persistent memory that tracks personal progress over time; integrated via Telegram Webhook API.
- ▶ Laboratorios Silicio -AI consulting venture: WhatsApp AI agents for clinics/spas built on Node.js + Express + PostgreSQL; custom two-brain architecture (static persona + LLM).
- ▶ Silicio Gadgets - E-commerce operation with Meta Ads (click-to-WhatsApp), AI-generated creative assets, full WhatsApp sales funnel scripted end-to-end.
- ▶ Transport Rental Automation (Client Project) - Designed and implemented an automation system for a local transport rental business: streamlined booking flow and client communication via WhatsApp, and operational tracking.
- ▶ Silicio Gadgets Ecosystem - Built a fully integrated commerce system with three interconnected modules: (1) a JSON-based inventory manager with POS functionality, add/edit products, export data, process sales; (2) an automated WhatsApp sales agent that handles the full funnel from lead to close; and (3) a live web catalog — all three synced in real time via APIs so any inventory change reflects instantly across the system.

SKILLS

Support & Ops	ServiceNow · Odoo · Assyst · Jira · SolarWinds · AS400 (IBM i) · VMware vSphere · Active Directory · Azure AD Sync · VPN Troubleshooting · Linux Server Monitoring · Change Management · P1/P2 Crisis Bridges · Root Cause Analysis
AI & Automation	RAG Systems · LLM API Integration (OpenAI · Anthropic · Gemini · Ollama) · OpenWebUI · Prompt Engineering · Python (Pandas) · AI-assisted scripting
Dev & Tools	Python · Figma · Node.js (basics) · HTML · CSS · REST APIs · OAuth2 · Webhooks (Twilio · Baileys) · PowerShell · VS Code · Git · Ubuntu/Linux Terminal · Postman · Adobe Premiere
Design & Creative	Photoshop · Illustrator · Figma · Photography · Composition · Ad creative production · Meta Ads Manager
Soft Skills	Technical documentation · Runbook authoring · Cross-cultural collaboration · Crisis communication · English (B2)

EDUCATION & TRAINING

- ▶ Full Stack Web Development Bootcamp — Codeable (2023) — JS, HTML5, CSS3, database structures, technical logic.
- ▶ Architecture Studies — 1 year — Strong foundation in spatial reasoning, systems thinking, and visual design.
- ▶ Photography Course — Technical and artistic photography; composition and light.
- ▶ Currently Learning (ongoing) — Figma · Node.js · React · REST APIs · Python (advancing) · GitHub Actions · UX Engineering principles.

LANGUAGES

- ▶ Spanish — Native
- ▶ English — B2 · Confident in video calls, written communication, and cross-cultural collaboration
